

# Cork Necklace

## Materials:

A wine cork

A very small eyelet screw

String

Magazine(s)

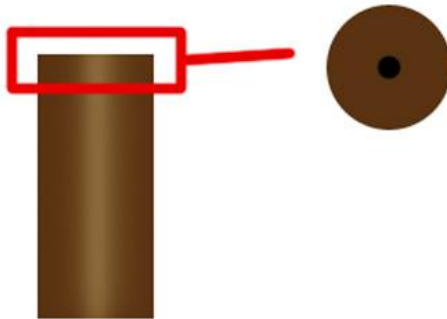

Glue

Tape

Scissors

1. Take your eyelet screw and screw it into your cork as close as you can to the middle circle on the top of the cork.

2. Pick a small image that is long enough to fit around the cork and short enough to fit the height of the cork. Cut it out.

3. Flip your picture over and put glue all over the back. Wrap it around the cork, but make sure it doesn't overlap itself. If it does, just cut that part off.

4. If you don't think it is secure enough, you can tape where the edges come together.

5. Now add a string long enough to fit over your head, tie it tight, and show it off!
